

**DM-307**  
MODERN GROOVE DESIGNER

**GROOVE DESIGN REDEFINED**

## Mac OSX Download Instructions

1. Download the Continuata Connect app *(via the download link in your email)*
2. Install the Continuata Connect software
3. Launch the Continuata Connect App
4. Copy and paste your unique serial code into the installer
5. Choose where you would like to install DM-307  
*Please make sure there is enough free space on your drive (>8GB)*
6. Click "Download" *(you will see a DM-307 folder show up that is ~4.6GB)*
7. Open Kontakt 5 (Player), and click "add library"
8. Navigate to the "DM-307" directory and click "choose"
9. To authorize DM-307, click "activate"
10. When prompted by NI Service Center, enter the 25 digit serial #
11. To Install the graphics for the multis, launch the installer found in the DM-307/\_MULTI GRAPHICS INSTALLERS\_/ folder and follow the prompts.

If you don't have the Kontakt 5 Player, you can download it here:

<http://www.native-instruments.com/en/products/komplete/synths-samplers/kontakt-5-player/>
